

Scripy Download Process

Link Download: <https://github.com/Genymobile/scrcpy/releases>

For USB:

Basic Setup Guide for Scrcpy:

1. **Download:** Get Scrcpy from the [official GitHub page](#).
2. **Enable USB Debugging** on your Android phone:
 - Go to **Settings > About Phone > Tap "Build Number"** multiple times to enable **Developer Options**.
 - In **Developer Options**, enable **USB Debugging**.
3. **Connect your phone via USB** to your laptop.
4. **Run Scrcpy:**
 - Extract the downloaded file, open the folder, and run scrcpy.exe.
 - Your phone's screen should instantly appear on your laptop.

For Wi-Fi:

Command: Right click on the empty place inside the folder of Scrcpy and then:

SHIFT + RIGHT CLICK = OPEN POWERSHELL OR CMD WINDOW

adb tcpip 5555 : *must connect usb for this*

adb connect 192.168.1.152:5555 : *can remove use and use*

My mobile IP: 192.168.1.152
